

For Immediate Release

Qeva (a division of Tara Farms 2000 Inc) recently published an article in the Canadian Vet Journal regarding its highly effective product, Joint Mobility for Dogs.

Joint Mobility is made from 100% pure Elk Velvet Antler and has been proven to relieve pain associated with arthritis, heal bones and repair damaged tissue, decrease swelling of the joints, provide joint lubrication and increase energy in pets.

Joint Mobility contains:

- Essential amino acids
- Prostaglandins (anti- inflammatory)
- Glycosaminoglycan (lubrication of joints)
- Chondroitin Sulfate (for relief of arthritic symptoms)
- Collagen (promotes cartilage growth)

A testimonial from pet owner, Alice Gordon states, “ For the past two years, Prince, my 7 years old shepherd has been suffering from arthritis. Within 3 weeks of giving him 2 capsules of Joint Mobility a day, he is more active and is definitely a happier dog.”

A 2- year study with the use of Joint Mobility on dogs suffering from arthritis and muscular injuries, produced better than 70% positive recovery.
